SEPTEMBER 1 STOCKS OF DRY BEANS AND DRY PEAS

A survey of stocks of dry beans and dry peas made by the Crop Reporting Board of the U. S. Department of Agriculture indicates that on September 1, 1944 there were 68,000 bags of dry beans (uncleaned) on farms and 1,898,000 bags (cleaned) stored in the usual commercial storage places and under War Food Administration storage contracts in or near producing areas. On the same date there were 14,000 bags of old dry peas (uncleaned) on farms and 1,466,000 bags (cleaned) in usual commercial and War Food Administration storage places in producing States. Estimate stocks by States and classes for September 1, 1943 and 1944 are shown in the following tables. The 1943 estimates of stocks of beans and peas include War Food Administration stocks only to the extent they were in usual storage places. Estimated stocks do not include beans and peas already in direct consumption trade channels.

DRY BEANS ON FARMS AND IN COMMERCIAL STORAGE ON JUNE 1  
(In thousand bags of 100 pounds each)
